

Choosing Laser Therapy

- Treatment is Painless -
- Therapy is Easily Applied -
- Highly Effective for -
Various Conditions
- Eliminates Pain -
- Reduces the Need -
for Pharmaceuticals
- Restores Normal Range -
of Motion & Physical Function
- Non-Invasive & Non-Toxic -
- No Known Adverse Effects -
- Provides Alternative for Patients -
Who Have Tried Other Modalities

Unlike many other treatments that mask pain or only address your symptoms, laser therapy treats the underlying condition to promote healing.

This means that treatments are effective & long-lasting.

Class IV Laser Therapy Today!

Class IV Laser Therapy
Improving Quality of Life

Achieving Relief From Conditions Such As:

- Joint Swelling
- Muscle Strain/Pain
- Tendonitis
- Myofascial Pain
- Arthritic Pain
- Neck and Back Pain
(Chronic and Acute)
- Plantar Fasciitis
- Shoulder Pain/
Impingement
- Tennis and
Golfer's Elbow
- Carpal Tunnel Syndrome
- Delayed Onset Muscle Soreness

The Class IV Laser for Pain Management

Class IV laser therapy is used for the relief of pain, to accelerate healing and decrease inflammation.

When light source is placed against the skin, photons penetrate several centimeters down and are absorbed by the mitochondria (the energy producing part of a cell).

This energy results in the restoration of normal cell function. The main goal of laser therapy is to stimulate the cell to perform its natural functions, but at an enhanced rate.

In contrast to “cold lasers,” which provide no feeling or sensation, high power diode laser therapy provides a warm, soothing feeling.

Positive Effects and Benefits of Laser Therapy

Anti-Inflammation

Laser therapy has an anti-edemic effect as it causes vasodilatation, but also because it activates the lymphatic drainage system (drains swollen areas). As a result, there is a reduction in swelling caused by bruising or inflammation.

Accelerated Tissue Repair and Cell Growth

Photons of light from lasers penetrate deeply into tissue and accelerate cellular reproduction and growth. The laser light increases the energy available to the cell so that the cell can take on nutrients faster and get rid of waste products.

Increased Metabolic Activity

Laser therapy creates higher outputs of specific enzymes, greater oxygen and food particle loads for blood cells.

Anti-Pain (Analgesic)

Laser therapy has a high beneficial effect on nerve cells which block pain transmitted by these cells to the brain and which decreases nerve sensitivity. Also, due to less inflammation, there is less edema and less pain.

Improved Vascular Activity

Laser light will significantly increase the formation of new capillaries in damaged tissue that speeds up the healing process, closes wounds quickly and reduces scar tissue.

Trigger Points and Acupuncture Points

Laser therapy stimulates muscle trigger points and acupuncture points on a non-invasive basis providing musculoskeletal pain relief.

GAITHERSBURG REGENERATIVE MEDICINE & LASER CENTER

Monika Twardzik-Roberts, PT
Physical Therapy and Wellness

Office: 301.330.5666

60 Market St., Suite 202 • Gaithersburg, MD 20878

• More than 20 years of experience

• Individual one-on-one treatments

• Pain laser, shockwave therapy in conjunction with manual therapy, exercise and other treatments
