WART TREATMENT INSTRUCTIONS

Using Aldara 5% Cream

Apply the prescription Aldara cream every night before going to bed. Apply sparingly to each wart and cover with moleskin, duct tape or sports tape.

Aldara packets are reusable; you can close with a clip to keep reusing. Disregard the single use application instructions.

Dr. Sherman may have also given you Salinocaine to apply to the wart as well. Apply the salinocaine sparingly every 4th day and cover with moleskin, duct tape or sports tape. This will help remove dead skin from the wart surface.
